Customer Portal

FSD : REQ6410

Summary

Functionality Gap

We don't have Customer portal capability completely.

Objective: Introducing the Customer portal for ONEERP users.

Streamline Communication: Enhance communication and collaboration between the company (ONEERP users) and its customers through a centralized platform.

Improve Efficiency: Facilitate efficient sales processes, order management, and information exchange for increased operational efficiency.

Introduced Functionality

For every ONEERP user, their sales team should be able to manage customer portal with separate instances like the ONEERP instance. This portal would be used by Sales Admin (to manage requests) & their customers (to perform transactions).

This includes process like

- 1) Registration and Approval of Customers,
- 2) View Catalogue & Create Enquiries,
- 3) View Quotations & Upload Order Copy,
- 4) View Orders,
- 5) View Delivery Notes
- 6) View Invoices

Customer Portal – Solution Overview

Process	Portal User Registration	Portal User Approval	Sales Enquiry	Quotation from Seller	Sales Order	Delivery Note	Invoices	Customer Return
	New User Registration	Verify details and Approve/Reject	Create an Enquiry by Seller	Quote creation by Seller	Creation & Approval of Order by Seller	Creation & Approval of Delivery Note by Seller	Creation & Approval of Invoice by Seller	Creation & Approval of Credit Note by Seller
	Notification to Seller/ Approver	Update Customer Contact Details	Notification to Customer	Notification to Customer	Notification to Customer	Notification to Customer	Notification to Customer	Notification to Customer
		User-Role Access Privileges	Create an Enquiry	View Approved Quotes	Upload Purchase order soft copy with reference to 1 or multiple Quotes	View Delivery Note	View Invoice	Upload Return order soft copy with/without reference to Delivery Note
		Notification to Approved/Rejected users	Notification to Seller	Notification to Seller	View Order			View Return Order
					Notification to Seller			Notification to Seller
					RPA Automation			
	New Process		Mail / SMS - Notifications / Alerts		Existing Process available in ERP		Process to be planned in Portal	RPA Automation

Customer portal features summary – v1.0

Configuration & Setup

- Provision to configure whether Customer Portal is required or not (Yes / No)
- Configuration of Allowed Number of Customer Portal Users (portal user license)
- Provision to configure Allowed number of portal users at customer level
- Passcode for each customer code for authentication during portal user registration
- Create Security User Group for mapping with portal user
- Enable Item Code in Data Security setup
- Enable Item Code in Data security configurator & define the criteria for what items must be applicable for that Security User Group

Registration & Approval

- Registration of Customer portal users
- Provision to Approve / Reject portal users registration by Sales team
- Manage Users and access privileges (Menu and Company level)
- Map users to Document, Sales Location
- Map users to Security User Group & Process pack

Customer Portal Features

- Home Page with Dashboards and pending transactions details on tiles
- Left Side Menu for core features
- View Catalogue
- Add to cart
- Create Enquiry
- View Quotations
- Upload Order copy
- View Orders
- View Delivery Notes
- View Invoices

Mail Notifications

- Mail to Registered portal user after registration
- Mail notification to sales admin on registration
- Mail to registered users after approval (with login credentials)
- Mail to registered users after rejection
- Mail to sales admin once Enquiry is submitted by portal user
- Mail to portal user once Enquiry is approved in ERP
- Mail to portal user once quotation is approved in ERP
- Mail to sales admin, once order copy is uploaded
- Mail to portal user once Sales order is approved in ERP
- Mail to portal user once Delivery Note is approved in ERP
- Mail to portal user once Invoice is approved in ERP

Addition of new fields in customer master

Adding two new fields in Customer master

1. **Passcode** - To validate with this code, while registering
2. **Allowed number of portal users** - Limiting the number of customer portal users at each customer level

The screenshot displays the Azentio Customer Master form. The top navigation bar includes the Azentio logo, a search bar with 'Customer' entered, and a user profile for 'SYSADMIN System Administrator'. The main form area is titled 'Customer' and features a 'Key Info' tab. The form includes various fields for customer information, such as 'Customer' (CU00002), 'Name' (Bright Manufacturing Solutions), 'Short Name' (Bright Manufacturing Solution), 'Control Account' (101200 - Receivables A/c), 'Sale Type' (0 - NA), 'Price Control' (0 - NA), 'GL Group' (GL - 531100), 'Regular Customer' (checkbox), 'Credit Control' (checkbox), 'Halal Applicable Y/N' (checkbox), 'Customer Portal Passcode' (masked field), and 'Allowed number of Portal users' (5). A 'Copy' button is next to the 'Customer' field. A profile picture of a woman giving a thumbs up is shown on the right. The 'Inactive' checkbox is checked. The 'Form Code' field is empty, and the 'Form Code for Search' field is also empty. The 'Print in SOA/Receivables' checkbox is unchecked, and the 'Parent Customer' checkbox is checked.

Create Security User Group

Create Security user group for mapping with Data Security Configurator(i.e., for filtering items which should be visible for specific portal user rather than showing entire item master in Catalogue screen)

The screenshot displays the Azentio ONEERP web application interface. The top navigation bar includes the Azentio logo, a search bar with 'Administrator' entered, and a user profile for 'SYSADMIN System Administrator'. The left sidebar lists various user roles, with 'CP_User-Customer Portal User' highlighted. A modal dialog titled 'User Group' is open in the center, containing a table with the following data:

User Group	Group Name	Group Type
CP_User	Customer Portal User	Security User Group

Below the table are 'Save' and 'Cancel' buttons. The background interface shows a 'Menu Search' bar and a 'User List' table with columns: User Id, Description, Group Id, Sec Group Id, Start Menu Id, Tel no, Tel Extn, Fax No, and Mobile No.

Enable Item Code in Data security setup & config

- Enable Item code in Data security setup & for the same Item code in Data Security Configurator, define the criteria for what items must be applicable for that Security User Group

The image displays two overlapping screenshots of the Azentio software interface. The top screenshot shows the 'Data Security Setup' page, which includes a table for configuring data security for various item codes. The bottom screenshot shows the 'Data security configurator' page, which is used to define security rules for specific item codes.

Registration Page

After entering Customer code, pop up appears to enter Passcode which validates the customer details with existing customer master details in ONEERP & completes the registration process by filling form

The screenshot shows the 'User Registration' page in the Azentio ONEERP system. A modal pop-up titled 'Passcode' is centered on the screen, prompting the user to 'Enter your password' with a text input field and 'Close' and 'OK' buttons. The background registration form is partially visible and includes the following fields:

- Category:** A dropdown menu currently showing 'CUSTOMER'.
- Customer Code *:** A text field containing 'CU00015'.
- Address:** A text field containing 'Global Manufacturers, Global Ma'.
- Designation / Description *:** A text field containing 'Manager'.
- E-mail *:** A text field containing 'hari@mailinator.com'.
- Mobile:** A field with a country code dropdown (showing India) and a text input containing 'Mobile'.
- Telephone:** A field with a country code dropdown (showing India) and a text input containing 'TelePhone'.

A 'Back to login' link is located in the top right corner of the registration form area.
