

Supplier Portal

March 20, 2025

Summary

Functionality Gap

We don't have Supplier Portal capability completely.

Objective: Introducing the Supplier portal for ONEERP customers.

Streamline Communication: Enhance communication and collaboration between the company (ONEERP customers) and its suppliers through a centralized platform.

Improve Efficiency: Facilitate efficient procurement processes, order management, and information exchange for increased operational efficiency.

Introduced Functionality

For every ONEERP Customers, their procurement team should be able to manage supplier portal with separate instance like the ONEERP instance. This portal would be used by **SYSADMIN**(to manage user access & privileges), **Procurement Admin** (to manage requests) & their **Suppliers** (to perform transactions).

This includes process like

- 1) Registration and Approval of Suppliers,
- 2) View Request for Quotation (RFQ) & Provide Quotation
- 3) View and Accept Purchase Order (PO)
- 4) Create Shipment Advice,
- 5) Dashboard

Process	Portal User Registration	Portal User Approval	Purchase Requisition	Request For Quote	Quotation from Suppliers	Purchase Orders	Shipment Note	Inspection	GRN / GRN Costing	Supplier Bills Registration	Supplier Return
	New User Registration	Verify details and Approve	MR - PR Requisitions	RFQ to 1 or many suppliers	Quotation details updated by Buyers	Creation & Approval of PO	Shipment Note by Buyers	Inspection details	GRN	Suppliers Bills update by Buyers	Supplier returned materials & qty
	Notification to Buyer/Approvers	User-Role Access Privileges		Notification to supplier portal users	View RFQ & Submit quotation	Notification to Suppliers	ASN- Advance Shipment Note		GRN Costing	RPA Automation	
		Notification to Approved users			Notification to Buyers	View & Accept PO	Notification to Buyers				
					Quotation Approval in ERP		Shipment Note Approval in ERP				
	New Process		Mail / SMS - Notifications / Alerts		Existing Process available in ERP		Supplier Portal Functionalities		RPA Automation		

Supplier Portal Features Summary – V1.0

Configuration & Setup

- Provision to configure whether Supplier Portal is required or not (Yes / No)
- Configuration of Allowed Number of Supplier Portal Users (portal user license)
- Provision to configure Allowed number of portal users at supplier level
- Passcode for each supplier code for authentication during portal user registration

Registration & Approval

- Registration of Supplier portal users
- Provision to Approve / Reject portal users registration by Procurement team
- Manage Users and access privileges (Menu and Company level)

Supplier Portal Features

- Home Page with 2 Dashboards and pending transactions details on tiles
- Left Side Menu for 3 core features
- View RFQ and Save - Submit Quotation
- View PO - Accept PO
- Save - Submit Shipping Note with reference to PO

Mail Notifications

- Mail to Registered portal user after registration
- Mail notification to procurement admin on registration
- Mail to Registered users after Approval (with login credentials)
- Mail to Registered users after Rejection
- Mail to Supplier Portal users once RFQ is Approved in ERP
- Mail to procurement admin once the Quotation is submitted by portal users
- Mail to Supplier Portal users once Quotation is Approved in ERP
- Mail to Supplier Portal users once PO is Approved in ERP
- Mail to procurement admin once the PO is accepted by portal users
- Mail to procurement admin once the Shipment Advice is submitted by portal users
- Mail to Supplier Portal users once Shipment Advice is Approved in ERP

Addition of new fields in Supplier Master

Adding two new fields in Supplier Master

1. **Passcode** - To validate with this code, while registering
2. **Allowed number of portal users** - Limiting the number of supplier portal users at each supplier level

The screenshot displays the Azentio ONEERP Supplier Master form. The top navigation bar includes the Azentio logo, a search bar with 'Supplier' entered, and a notification bell with '295'. The user is identified as 'SYSADMIN System Administrator'. The form has a 'Supplier' tab selected, showing a list of tabs: Custom Field, Analysis, Contact, Attachments, Key Info (selected), Company, Currency, Finance Group, Payment Terms, Product Supplier, Bank Details, Bank Payment, Notes, Incoterm, Applicable, HPS, and GST Details. The form fields are organized into two columns. The left column includes fields for Supplier (SU00003), Name (Prime Distribution Inc), Short Name (Prime Distribution Inc), Regular Supplier (checked), Control Account (102300 - Payable - Sundry creditors), Print in SOA/Payables (checked), Credit Limit Days, Sub contractor, Parent Supplier (SU00003 - Prime Distribution Inc), TDS Applicable Y/N, Halal Applicable Y/N, Supplier Portal Passcode (masked with dots), and Allowed number of Portal users (2). The right column includes fields for Credit Amount, Parent Supplier (checked), and Shipment Mode (Road - Road). A 'Copy' button is next to the Supplier field, and a 'No image' placeholder is shown for the supplier's logo. The form is marked as 'Inactive'.
